### **DETAILED ACTION**

The following is a response to the amendment received on September 18, 2007 which has been entered.

#### ***Response to Amendment***

Claims 1-6 are pending in the application.

-The 112 2<sup>nd</sup> rejection of claims 1-3 has been withdrawn due to applicant correcting lack of antecedent basis of claim limitations.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al 5,121,820. Brown discloses an automatic transmission for shift operation by engaging and disengaging frictional engaging elements in a multi-stage transmission unit (18) arranged to a torque converter (14) using a hydraulic control valve (38), means for measuring a controlled variable (duty cycle for pressure to current amount to operate valve) of the hydraulic control valve relative to a difference between input revolutions of the torque converter and turbine revolutions of the torque converter (52 provides the slip value between a difference of the impeller speed (input) and the turbine speed as input to control the valve), means for storing (via 122) an amount of correction (corrected duty

cycle) based on the controlled variable to an electronic controller (42) for controlling the transmission.

***Allowable Subject Matter***

Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 4-6 are allowed.
